

Requirements Elicitation

	User Story	Acceptance Criteria	Priority
RQ1	As a CEO of a tech company, I want a functionality to compare data from different countries so that I can have a holistic view of how the countries perform in certain indicators.	- A filter in the dashboard that allows for specifying certain countries and indicators.	Must have
RQ2	As the general public, I want a secure method of logging in and out, so that I can view my customized datasets without security risks.	- A 'create account' page that asks for a username, email and password - A sign-in page that asks for a username and password.	Must have
RQ3	As the general public, I want to access the app on iOS and Android, so that I could access the app on the move.	- Implementation of the web application on mobile devices.	Won't have for now
RQ4	As a data scientist, I want a feature that documents the data and visualisations I need, so that I can summarise and share them with my boss.	- A feature that selects certain visualisations and data and combines them into a document.	Won't have for now
RQ5	As a product manager, I want a sharing functionality, so that I can discuss my findings with my team at my company.	- Implement a 'share' functionality that allows sharing using URLs.	Should have
RQ6	As a CEO of a tech company, I want to see multiple visualisations at the same time, so that I can easily compare different countries' performances.	- Dual windows that show two different charts at the same time.	Could have
RQ7	As a CEO of a tech company, I want a feature that saves certain settings about my visualisations so that I don't have to change the settings each time.	- A 'save settings' button that sets the current settings as the default value for the dashboard.	Should have
RQ8	As the general public, I want to know more about the sources of the data, so that I have an idea of the reliability of the data.	- Have a reference of the source of the data for each dataset in a separate 'source' tab.	Must have
RQ9	As the general public, I want a forum so that I can ask questions and discuss some findings with the community.	- Have a forums page that allows users to make posts and add comments.	Should have
RQ10	As the general public, I want to give feedback about the application so that the user experience can improve in the future.	- Have a separate page that allows users to give feedback to the developers.	Should have
RQ11	As a marketing staff, I want a news feature that displays related news (i.e. economic and political events) so that users can stay up to date about the business environment of countries that they 'follow'.	- A 'news' page that is linked to a third-party API that is updated whenever a story related to the economic or political state of a country followed by the user breaks out.	Could have
RQ12	As the general public, I want to be able to change my password anytime so that I can minimise security risks	- A 'my account' page that allows users to change account settings.	Must have
